Andrii Bilyi

Full-stack developer

I have a background in food manufacturing, but I'm always looking to add software development to my workflow. So I gathered my experience, added a programmer education, and want to start developing for full-time.

Experience

2022-until now
MHP "Legko" | Myronivka
Head of quality department
My main responsibility is to manage quality inspectors and solve product quality problems. In addition, I develop software for my department and company. For example, Telegram bots that collect information for statistics in table-sheets, informative Telegram bots, and now I am working on an electronic documentation application.

2017-2022
Dooobra ferma | Boguslav
Production director
After success as a cheese maker, I began to manage a whole factory. I improved the production and increased the staff, assortment and quantity of products. Our product has received international awards. In addition, I improved the financial system using complex applications with Google Sheets.

2015-2017
Dooobra ferma | Boguslav
Cheesemaker
Before that I worked in the field of microbiology in Kyiv, so at that time I thoroughly studing a new business from the beginning. My goal was to make the perfect craft cheese, and I worked a lot with foreign artisans.

Education

2015-2017
Full-stack developer
GoIT

2007-2012
Biotechnologist
National University of Food Technologies
